

## JLG Forklift Parts

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora set out on a cross country journey in their RV. Recently retired, after spending several years working with his brother to manufacture their crane company into an industry leader, John had no idea that fateful trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end consequence of a road trip.

All through their trip, John reacquainted himself with past business connections along the way. In combination with these conversations and a significant event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a vast market for a product that could quickly and securely lift individuals in the air to accomplish maintenance and other construction functions.

Following their return from holiday, John set up a partnership with two of his friends and obtained a metal fabrication business in McConnellsburg, Pennsylvania. Opening with a small crew of twenty personnel, they fashioned and sold their first JLG aerial work platform in 1970. The business incorporates many of the basic design elements of that original lift into current models.

JLG forklifts have come a long way from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Nowadays, the business proudly continues to expand itself into numerous marketplaces worldwide and develops new products to make sure clients are capable of being more effective and perform in the workplace within a safer atmosphere.
